

TEST TWO

Each group of four words in the thirty lines below contains two words which are either (a) the same or nearly the same in meaning, or (b) the opposite or nearly the opposite in meaning.

Find the two words in each group that are either same or opposite, and write the numbers of these two words in the column at the right, headed "Same," or the column headed "Opposite," as the case may be.

The first group of words, "1. warm, 2. heavy, 3. long, 4. short," contains two words ("long" and "short") that are opposite in meaning, so that the figures 3 and 4 are entered in the column headed "Opposite." The second and third groups have also been marked correctly.
